

# Why choose SATO RFID labels?

## High readability

Provide RFID labels that match RFID printers and achieve high print quality and performance that does not interfere with customers' operations.

- ✓ 100% guaranteed to work with SATO printers
- ✓ Tags that do not work are removed and shipped
- ✓ Storage of production history

In addition to standard inlays, SATO offers RFIDs that use original inlays. The original RFID offered by SATO has five features that enable high read rates. These are: antenna design tailored to on-site operations; production equipment that enables high-speed production; tags and labels optimized for each application; and quality control that takes advantage of the know-how accumulated through our involvement in conventional production. We also offer solutions based on the knowledge and expertise we have accumulated in the field.

## ECO

### ✓ NO-Plastic

SATO-designed tags do not use plastic substrates.  
\* Except for items (No. 062001101 and 062001271) use film-based substrates.

### ✓ NO-Chemicals

We don't use solvents or produce waste fluid that have adverse impact on the environment.

### ✓ NO-Waste

We recycle aluminum that were unused during manufacturing.

- RFID products contain sensitive semiconductor chips that may cause their read performance to vary substantially depending on the environment where they are used.
- Field testing for RFID solutions is required in the customer's actual operating environment prior to implementation.
- As RFID solutions are built based on field testing, any subsequent changes to tagging positions and other conditions may affect their intended performance.

## Nog specifieke vragen? Plan een afspraak!

Ik kan me voorstellen dat je na al deze informatie je nog met hele specifieke vragen zit over hoe slimme printers jouw processen kunnen optimaliseren. Ik beantwoord die vragen graag. Plan daarom vrijblijvend een afspraak met mij in. Dan bespreken we hoe we jouw huidige processituatie kunnen verbeteren dankzij de inzet van onze slimme printers.

Uiteraard kan je me ook bellen op 0348 444437!
